

Enabling QuickView

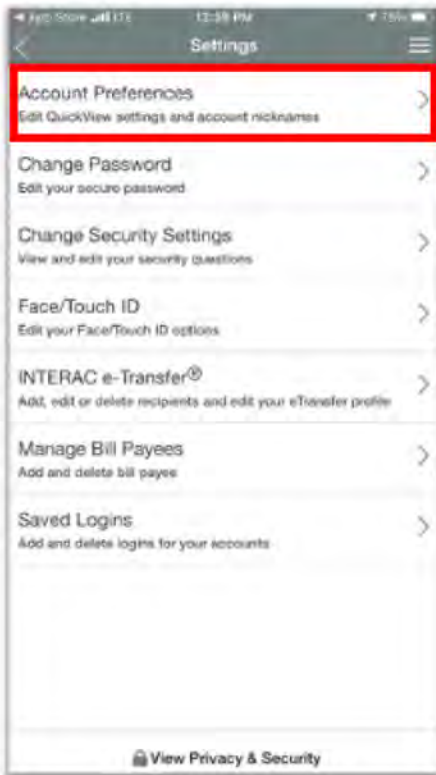

1. Open the NBCU Mobile App or download it from the App Store or Google Play. Begin by pressing the “Log In” button in the top right corner. Next, enter your user ID, turn on the “Remember Me” toggle, and press “Continue.” Then, enter your password. If this is your first time logging into the app, you have to set a Nickname and are given the option to turn on QuickView using the toggle below that. Press “Continue” to log in. If this is not your first time logging in, continue to step 2.

2. If it is not your first time logging in, and you wish to turn on QuickView, log in using your username and password as usual. Then navigate to settings by swiping left and pressing “Settings.”

3. Once in the settings menu, select “Account Preferences.” Now, you can toggle whether QuickView is on or off using the slider near the right-hand side of the screen. After you have chosen your setting, press “Save” to confirm.

4. You will now be able to see your account balances by simply opening the app, without having to log in. You can scroll through your accounts by pressing the arrows on each side of the QuickView bar.
